ENROLLMENT: To provide context for the Cohort Default Rate (CDR) data we include enrollment data (students enrolled at any time during the year) and a corresponding percentage (borrowers entering repayment divided by that enrollment figure). While there is no direct relationship between the timing of when a borrower entered repayment (October 1 through September 30) and any particular enrollment year, for the purpose of these data, we have chosen to use the academic year ending on the June 30 prior to the beginning of the cohort year (e.g., FY 2016 CDR Year will use 2014-2015 enrollment).

The Department has not released the most recent Cohort Default Rates as of yet. The Department releases cohort default rates twice each year. Generally, the Department releases draft 3-year cohort default rates in February. After schools receive their draft cohort default rate data, schools are provided an opportunity to identify and correct any inaccuracies by submitting an incorrect data challenge. The Department then releases the official 3-year cohort default rates. Official cohort default rates are generally released to schools and the public approximately six months after the release of the draft cohort default rates. However, the official cohort default rates must be released no later than September 30th of each year.
